

Sharepoint Alternatives Questions

Hi,

- I am installing O3Spaces on my Microsoft Active Directory Server, is it good compared to Microsoft Sharepoint? Can you reccommend any other good freeware alternatives?

- Thank you in advance!

Answer :: Hi,

I'm using O3 myself.

It depends on what you're looking for. If you're looking for document collaboration or lightweight document management i'd say O3Spaces is much more user friendly and convenient than SP.

But if you want a customization platform and you've got consultant skills SP might be what you want.

Also, on O3 as a free to use version you get much more support than you'll ever get on SP.

Just my 2cts. [Read More](#)
