

Sharepoint Development Questions

[How can we create or design database for the sharepoint or wss site?](#)

No Accepted answer found [View Answer](#)

[I have made this web custom control. this control have LinkButton which have an event. the custom control works fine in .aspx page. But, when i use it in a web part, the event never rise even if i clicked on the LinkButton. Please, if you worked before in .net and sharepoint development and faced a similar problem, i'll really appreciate your help.](#)

[Thanks](#)

Answer :: Try to ask your question at the .net forum at the site bellow. The people there will help you more:

[I am begining the career with sharepoint, but confuse between sharepoint and SQL server. which has better job prospects and future. is most of sharepoint development being outsourced?](#)

Answer :: Sharepoint is web portal and SQL Server is Database.
there is no comparison

Sharepoint use SQL Server at back-end. [Read More](#)
