

Sharepoint Security Questions

I want to access the functionalities of MSWORD into sharepoint site.. I have tried this by converting MSWORD.OLB to MSWORD.DLL file and placed it in gac. It works fine only for Administrator.. It is not working for any other user(User permission set to Full control).. Please Help

Answer :: Some programs only work for Administrator. Install the mword.dll using the otheres users. [Read More](#)

the highest permissions
