

## Sharepoint XML Questions

[Has anyone managed to get this working?](#)

Answer :: Does Attensa RSS have an API to work with? That's the only way to effectively get that into a web part. How does the Outlook version work? .... [Read More](#)

[Trying to figure out how to get the RSS feeds to work in Sharepoint 2007.](#)

Answer :: I Dont have that program and don't even RSS feeds .... [Read More](#)

[I'm setting up a new weather section on my website. I'm completely new to XML, but that's the only way I can provide free weather data for local cities that updates automatically. I need to know how I can post the current conditions image \(that is included in the XML document\) into the webpage.](#)
